

# Epidemiologic Profile of New York State: Data through December 31, 2003

**Reported AIDS Cases, Persons Living with HIV, Persons Living with AIDS, and Deaths in New York State - 1981 through 2003<sup>1</sup>**

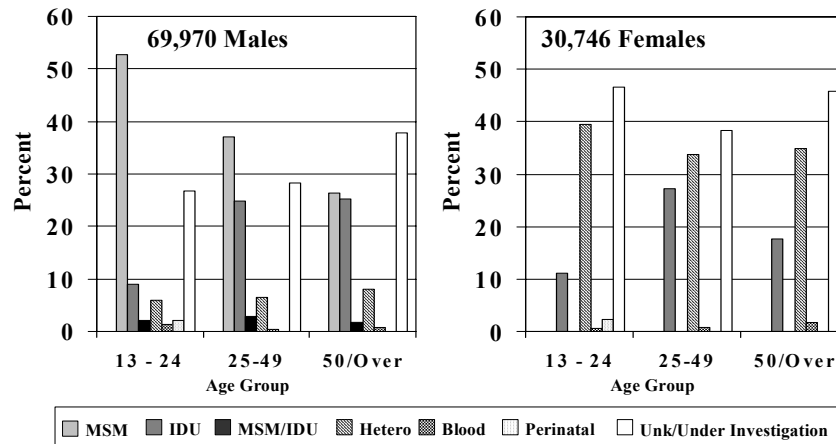

**102,305 Persons (for whom Race/Ethnicity is known) Living with HIV and AIDS by Percent Distribution of Transmission Category<sup>1</sup>**

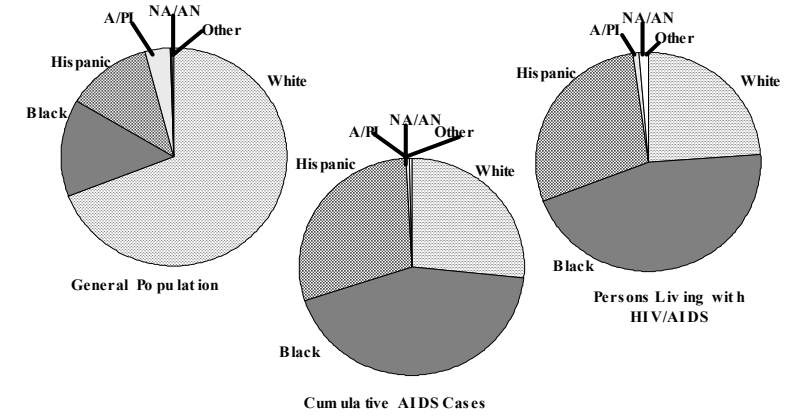

**Important Data Notes**

- HIV and AIDS data from BHAЕ are through December 31, 2003. Case numbers for years 2002 and 2003 may increase due to report/processing time.
- Unless individuals are known to be deceased from the NYS or NYC Vital Records or the National Death Index, they are presumed to be living.
- HIV/AIDS case data from BHAЕ are [a] all CDC-confirmed cases (for which race/ethnicity must be included), [b] all surveilled cases for which race/ethnicity is unknown, and [c] exclusive of prisoners, unless otherwise noted.

**100,716 Persons (aged ≥ 13 years with known gender) Living with HIV and AIDS by Gender, Transmission Category and Age Group<sup>1</sup>**

**New York State Population Comparison: General Population, Cumulative AIDS Cases and Persons Living with HIV and AIDS<sup>1,3</sup>**

**2002 data from the NYS Comprehensive Newborn Screening Program notes that women giving birth in New York State had a prevalence of 0.30 % or approximately one in 333 women giving birth had a positive HIV test result.**
